ABOUT ME

I am a self-taught developer with six years of experience building full-stack web projects, including commercial websites and custom integrations. Freelancing taught me to learn fast, work independently, and deliver real products for real clients. I am driven by the desire to build meaningful software in collaborative environments and contribute to innovative projects. My long-term goal is to create technology that supports small businesses and strengthens emerging digital ecosystems.

PROFESSIONAL EXPERIENCE

Freelance Web Developer | February 2023–present

Kwork platform

- Designed and developed over 7 custom websites using WordPress, HTML, CSS, and JavaScript
- Delivered client projects including LemboGlamping (St. Petersburg), generating \$10,000+ revenue in first 6 months
- Provided ongoing support and redesigns for active clients
- Collaborated with clients to define project scope, implement responsive design, and optimize user experience
- Gained expertise in CMS integration, SEO optimization, and client communication

Programming Instructor | September–November 2024

Academy TOP

- Taught basic programming and digital literacy to two groups of children (approx. 20 students per group)
- Developed interactive and game-based teaching methods to enhance engagement and understanding
- Created lesson plans and published student progress reports on the academy's website for parents
- Strengthened communication, leadership, and pedagogical skills through classroom management and curriculum delivery

Assistant at Pottery Workshop | December 2025

Pottery Workshop "Clay & Flame"

- Assisted with sorting and organizing ceramic products during peak season
- Maintained cleanliness and prepared workshop spaces for participants
- Supported artisans with basic ceramic techniques and daily studio tasks
- Strengthened attention to detail, reliability, and teamwork in a fast-paced environment
